

COMPASS POINTS 2015

Minnesota Compass looks at key measures in 13 topic areas to promote cradle-to-career success for all of Minnesota's youth, a strong and vibrant economy and workforce, and healthy communities throughout the state.

Notable Trends

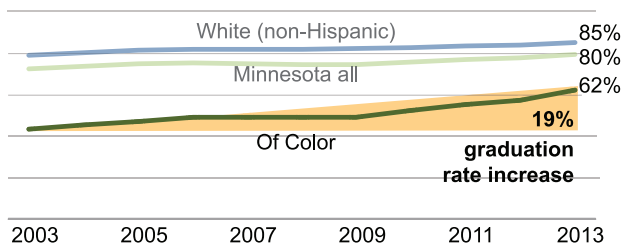

EDUCATION: GRADUATION RATES ROSE AMONG STUDENTS OF COLOR, BUT GAPS REMAIN LARGE

The graduation rate among students of color has increased 19 percentage points over the last decade, narrowing the racial gap from 36 percentage points in 2003 to 23 percentage points in 2013.

The flip side of this good news is that the racial gap is still wide, and closing it won't necessarily get easier. Looking along the educational pipeline we see big racial and economic gaps that need attention.

ECONOMY: JOBS HAVE RECOVERED, BUT THE BENEFITS HAVE YET TO REACH EVERYONE

At the close of 2014, the number of jobs in Minnesota reached about 100,000 more than the pre-recession peak in 2007!

Despite the broader economic recovery, overall poverty remains near a 20 year high, with the highest rates among people of color.

HEALTH: HIGH STANDINGS OVERALL, BUT FURTHER IMPROVEMENT IS ELUSIVE

A look at our Compass key measures shows Minnesota has some of the lowest diabetes and obesity rates in the nation. We also rank high for insurance coverage.

The bad news here is that Minnesota's diabetes trend continues its slow climb, and our obesity rate appears stuck at 25 percent of our adult population.

Notable Trends continued from front

HOUSING: BURDENS ON HOMEOWNERS ARE EASING, BUT HOMELESSNESS PERSISTS

The latest American Community Survey data show a second consecutive year of decline in the prevalence of cost burdened Minnesota homeowners. This is particularly good news as the proportion of Minnesota's homeowners who were housing cost-burdened nearly doubled between 2000 and 2007.

On the very lowest rung of the housing ladder, however, things continue to look rather bleak. The most recent statewide study of homelessness from Wilder Research counted 10,182 homeless people, and estimates that more than 14,000 Minnesotans are homeless on a given night.

CIVIC ENGAGEMENT AND PUBLIC SAFETY: GOOD NEWS

In spite of recently slipping in our national ranking, Minnesota continues to be among the nation's leaders in volunteerism. In fact, the Corporation for National and Community Service places the value of Minnesota's collective volunteering efforts at \$3.9 billion.

Serious crime, which includes reported property and violent crime, has steadily decreased for over two decades. Although the downward trend has recently tapered off, the number of property crimes, which accounts for more than 90 percent of serious crime, has declined by 43 percent, while violent crime has declined by 21 percent since 1990.
